

# **Analytical Methodologies for Analysis of AAV Viral Vector and Nucleic Acids for Gene Therapy**

Sahana Mollah, Ph.D.

March, 2020

USP Course Owner: Maura Kibbey

Course ID: BIO-CMC-08

# Disclaimer

Because USP text and publications may have legal implications in the U.S. and elsewhere, their language must stand on its own. USP shall not provide an official ex post facto interpretation to one party, thereby placing other parties without that interpretation at a possible disadvantage. The requirements shall be uniformly and equally available to all parties.

In addition, USP shall not provide an official opinion on whether a particular article does or does not comply with compendial requirements, except as part of an established USP verification or other conformity assessment program that is conducted separately from and independent of USP's standards-setting activities.

Certain commercial equipment, instruments or materials may be identified in this presentation to specify adequately the experimental procedure. Such identification does not imply approval, endorsement or certification by USP of a particular brand or product, nor does it imply that the equipment, instrument or material is necessarily the best available for the purpose or that any other brand or product was judged to be unsatisfactory or inadequate.

This course material is USP Property. Duplication or distribution without USP's written permission is prohibited.

USP has tried to ensure the proper use and attribution of outside material included in these slides. If, inadvertently, an error or omission has occurred, please bring it to our attention. We will in good faith correct any error or omission that is brought to our attention. You may email us at: [legal@usp.org](mailto:legal@usp.org).

# Sahana Mollah, Ph.D.

**Company:** SCIEX

Sahana Mollah completed her PhD in Bioanalytical chemistry from the University of Virginia. She has more than 20 years of experience in analytical development and mass spectrometry for biological analysis. Her early work involved in utilizing LCMS for epigenetic and immunology studies including cancer research. In 2004, she started as an application scientist at SCIEX focusing on protein characterization and quantitation. Later, she led the team

of applications scientists for Academics and Biopharma. She currently manages the SCIEX global biopharma scientific collaborations as well as technical marketing for capillary electrophoresis. In the past couple of years, she has been heavily involved in the gene therapy analytical assay development at SCIEX using capillary electrophoresis and mass spectrometric tools.

# Empowering a healthy tomorrow

A healthier world needs a strong foundation—one that establishes quality, sets the bar for scientific rigor and technological progress, and epitomizes collaboration between industry, nonprofits, government and academia.

From the standards we create to the partnerships and conversations we foster, our scientists, advocates and network of experts are critical to constructing and reinforcing this foundation to ensure people stay healthy.

# Mission

**To improve global health through public standards and related programs that help ensure the quality, safety and benefit of medicines and foods**

200

**years building quality  
foundations for a  
healthier world**
